

HelpOH

KEY INSIGHT_

“Two very different users, one platform. The design had to serve both without compromising either.”

PROBLEM_

A two-sided problem: unreliable help for users, unfair work for workers.

HelpOH connects users with vetted professionals for household services while giving workers legal protections, training, and consistent income. Designed for Malaysia’s rapidly growing economy.

MY ROLE_

Sole designer across research, UX strategy, UI design, and prototyping.

SOLUTION_

Search, book, done, with transparent pricing and no friction.

A streamlined booking platform with clear service categories, location, date and time selection, and pricing clarity built to create first-time confidence.

Two personas, one platform, designed to serve both sides equitably.

The challenge was designing for users who need reliable, affordable household help and workers who need fair pay, trust, and consistent opportunities. The product had to balance both without feeling split in half.

RESEARCH_

Reliability for users, security for workers.

Mapped two personas, Farah and Arif, to make sure the platform worked for both the customer booking help and the worker building a sustainable livelihood.

CHALLENGE_

Booking flows had to feel transparent, fast, and familiar.

The interaction borrowed trust cues from Grab so the experience would feel recognisable in the Southeast Asian market while keeping everything on a single booking surface.

Farah Amin

Demographics:
Age: 32
Location: Kuala Lumpur
Profession: Busy Professional

Background:
Farah works as a lawyer and rarely finds time to handle household chores like cleaning or repairs. She struggles to find reliable and affordable service providers and often resorts to word-of-mouth recommendations.

Frustrations:

- Finding reliable service providers takes too much time and effort.
- Unclear pricing and poor customer service are common issues.

Goals:

- Quickly book trustworthy professionals for tasks like cleaning, plumbing, and repairs.
- Compare service options with transparent pricing.
- Avoid hassle and ensure a smooth experience.

Needs:
A user-friendly app that connects her to verified professionals for essential services with transparent pricing and hassle-free bookings.

Arif Rahman

Demographics:
Age: 29
Location: Selangor
Profession: Skilled Worker (Plumber)

Background:
Arif is a skilled tradesman looking for steady work and fair wages. He often struggles to find jobs that pay on time or provide consistent opportunities. He wants a platform that connects him to clients directly and supports his career growth.

Frustrations:

- Inconsistent work opportunities and late payments.
- Difficulty finding legitimate clients and securing trust.

Goals:

- Secure regular and well-paying jobs through a trustworthy platform.
- Access training and certification programs to improve his skills.
- Build a strong client base without relying on informal networks.

Needs:
A reliable platform that connects him to verified clients, ensures timely payments, and provides opportunities for professional growth and legal security.

Search, book, done, with transparent pricing and no friction.

A desktop platform with streamlined search-and-book, transparent pricing, time selection, and service categorisation. Clarity over density.

OUTCOME_

Designing for two very different users clarified what the product needed to prioritise.

APPROACH_

Trust cues, transparency, and a single-surface booking flow drove the interaction model.

NEXT_

The next step is a dedicated worker dashboard with job management and training access.
