

Nine modes. One premise: color has no fixed identity.

A nine-mode macOS application where each view isolates one perceptual color phenomenon with live controls. The amber HUD frames the app as an instrument of observation, not a creative canvas.

LIVE APP_

[ALBERS-WEB.VERCEL.APP](#)

OUTCOME_

Constraint became identity, and the product got sharper because of it.

APPROACH_

Vibe coding worked because the design intent was precise from the start.

NEXT_

The long-term goal is turning Albers into a genuine Mac teaching tool.
